As You Grow, You Will Understand

As you grow, you will understand more and more, because things won't be a mystery to you. The further down the path you get, you will attain to spiritual understanding, that is, understanding as I understand and give to you. And many things that you don't understand now, you will understand then. But at that time, you will see that I am absolutely just and justification, and you will understand then why I couldn't move under those circumstances.
